EXPERIENCE

Web Developer | Etna Interactive (San Luis Obispo, CA)

March 2017 – Current

- Working in a fast paced team environment with senior developers and engineers to build and manage large projects for corporate clients.
- Collaborated with designers, product managers, and marketing specialist to create clean interfaces and simple, intuitive interactions and experiences.
- Carry out quality assurance tests to discover errors and optimize usability.

Web Developer / Designer / Owner | KingFish Designs (San Luis Obispo, CA)

March 2016 – Current

- Executing design to perfection in both appearance and functionally on any device or browser using the latest languages/software.
- Working closely with clients on a month to month basis, while providing support for website maintenance, updates, search engine optimization, as well as security / backups.
- Communication and collaboration with the designer, in developing large and small scale responsive websites.

Freelance Developer | Harvest Moon (Morro Bay, CA)

September 2015 – Current

- Communication and collaboration with the design team, developing large and small scale responsive websites. Executing design to perfection in both appearance and functionally on any device or browser using the latest languages/software.
- Working closely with clients on a month to month basis, while providing support for website maintenance, updates, search engine optimization, as well as security and backups.

Web Designer / Developer | Kirby Morgan Dive Systems (Santa Maria, CA)

July 2011 – February 2016

- Developed, administered, and maintained websites using various content management systems including: Wordpress, Drupal, Joomla, and Xcart.
- Created clean pixel perfect responsive CSS / HTML websites, in both a small and large scale. Worked closely with designers, and applied design comps to custom theme functionality. Advocated a web-standards approach to increase search engine optimization and accessibility across all platforms.
- Constructed and modified plug-ins / modules that integrated web services and custom applications for services of our clients.
